

Sustainable Sun Prairie: Developer Guide

Summary

This resource has been developed by the City of Sun Prairie for use by developers, property owners, and commercial entities in support of promoting sustainability related strategies in both existing and new development projects. Sustainable Sun Prairie is one of eight focus areas in the [Council & Mayor 2019-2022 Strategic Plan](#).

On the [Sustainable Sun Prairie](#) webpage, businesses can find many additional resources. For additional support, questions, or examples of city projects please reach out to our Sustainability Coordinator - Scott Semroc, ssemroc@cityofsunprairie.com

Energy

Energy efficiency & renewable energy are key strategies to achieving sustainability goals. The following entities: (1) [Sun Prairie Utilities](#), (2) [WPPI Energy](#), (3) [Focus on Energy](#) offer a variety of programs and incentives.

Electrification

New technologies are enabling electrification of equipment, vehicles, and buildings. (1) [Alternative Fuels](#), (2) [Heat Pump Technology](#), & (3) the [Beneficial Electrification Toolkit](#) are all examples of electrification options.

Green Infrastructure

[Green infrastructure](#) is a broad category that includes raingardens, green roofs, and permeable pavement, which have several benefits. [Roofing Examples](#) (pages 8-10).

Green Products & Buildings

[ENERGY STAR](#) is a rating system for both products & [buildings](#). [LEED](#) is one of many green building certification systems, which offer strategies & guidelines for decision-making.
