

Tips for Choosing your No Mow May WiBee Survey Sites

KEY:	Mowed lawn	Mowed survey area
	Unmowed lawn	Unmowed survey area

All of your WiBee surveys should be completed in paired mowed/un-mowed areas. If you can't find specific areas in your lawn which fit all of these criteria, that's ok! Just try your best to find areas that are as similar as possible.

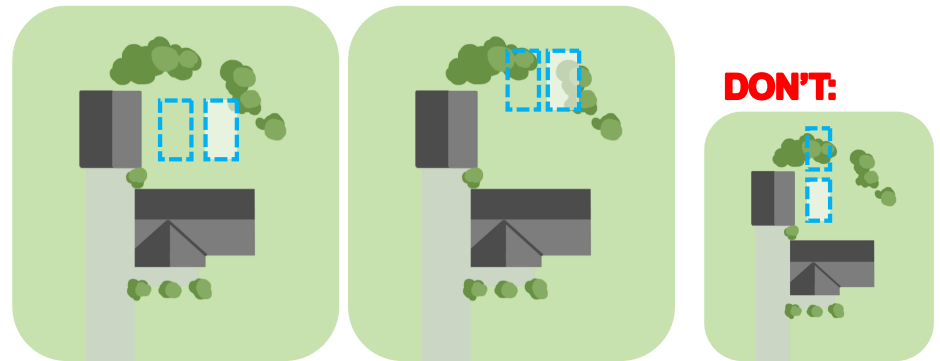

Tip 1: Survey areas should be adjacent to each other. For example, if you have both a front and a back yard, both survey areas should be in either the front or back yard.

DO:

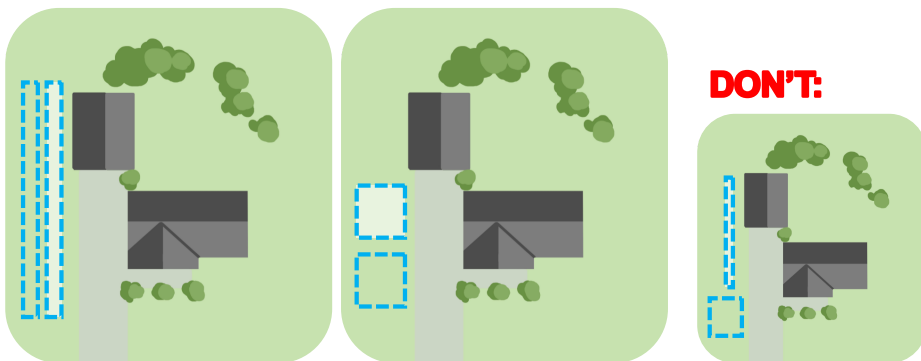

Tip 3: Survey areas should be similarly shaded by trees, buildings, etc. and should be equidistant from features like gardens.

DO:

Tip 2: Survey areas can be large or small but should be approximately the same size and shape. Each survey area is at least 25 square feet in size if possible.

DO:

Tip 4: If you have an idea of where weedy flowering plants tend to grow in your lawn, try to choose survey areas that are similar in terms of the number and variety of flowers which tend to grow there.

DO:
